

Parker Kittiwake– Environmental Policy

Responsibility – Operations Manager

Parker Kittiwake designs, manufactures and supplies products for condition monitoring, enabling customers to improve their environmental impact.

Customers employ Parker Kittiwakes products to increase the longevity of their assets and reduce the amount of lubricant they use during their lifetime.

Parker Kittiwake is committed to improving the Environment within which we live and work. Our aims (as far as practical) are to:

- **To protect the Environment**
- **To promote the recycling of waste, whilst proportionally reducing waste**
- **To use energy efficiently**
- **To design products, as far as practical, to have minimal environmental impact during their whole life cycle**
- **To prevent pollution**
- **To comply with relevant environmental legislation**

To achieve this, we have implemented an Integrated Environmental Management System that meets the requirements of ISO14001.

This policy is reviewed yearly as part of the management review process and is monitored by measurable objectives, as part of a continual improvement process. All staff are briefed on this policy and made aware of the objectives. The policy is displayed on the company website, to demonstrate our commitment to the environment. Issue level and date is that of the last change to the policy not the date of the last review.
