

Kittiwake Developments Ltd - Environmental Policy

Responsibility – Plant Manager

Kittiwake Developments Ltd designs, manufactures and supplies products for condition monitoring, enabling customers to improve their environmental impact.

Customers employ Kittiwakes products to increase the longevity of their assets and reduce the amount of lubricant they use during their lifetime.

Kittiwake is committed to improving the Environment within which we live and work. Our aims are (as far as practical and within our immediate control) to:

- To promote the recycling of waste, whilst proportionally reducing waste
- To use energy efficiently
- To design products, as far as practical, to have minimal environmental impact during their whole life cycle
- To prevent pollution
- To comply with relevant environmental legislation

To achieve this, we have implemented an Integrated Environmental Management System that meets the requirements of ISO14001.

This policy is periodically reviewed and is monitored by measurable objectives, as part of a continual improvement process. All staff are briefed on this policy and made aware of the objectives. The policy is displayed on the company website, to demonstrate our commitment to the environment.

Approved by Steve McKelvie

and Gavin Friend

Issue 7 - 12/09/13.

Distribution (This policy is accessible via the internal website / external website and the environmental notice board, any updates to this policy will necessitate a change to these three locations to ensure they stay at the same issue)
